BEAVER MINE OWNERS ACTIVE

Development is Being Driven on Many Properties.

LEWIS RETURNED TODAY.

States That Majestic is Adding Some More Properties to Its Holdings -Matt Cullen Active.

News from Beaver county is most encouraging and from all reports the entire district will be the scene of much activity this winter. Many properties are now being developed and within a short time not a few others will reccive attention.

Prest. A. B. Lewis, of the Majestic, who returned this morning, reports work to have commenced on the ground whereon the new 300 ton smelter will stand and at the old Hiskory buildings are being put up preparatory to a vigorous campaign of development, The O. K. is in splendid condition. Mr. Lewis reports that several more properties will soon be added to the Majestic company's holdings. He says, however, that the time is not ripe for disclosing the details. Among this morning's arrivals from

Beaver county was Matt Cullen who and other claims in the district. It has been commenced on the Wild Bill, and that with five men development is now being pushed. Mr. Keeley, a inent Chicago brewer, is interested with him.

Work on the Copper Mountain is be-ing actively pushed and the mine is re-ported to have a great showing. Man-ager Lloyd is much pleased and hopes gen livyd is made and the property demonstrated beyond a doubt. The owners of the Cave mine, the Carbonate and Rattler and several other properties are doing much to open up

CURBING MINUS TODAY. Exchange Members Decide to Stand By Governing Board.

There was absolutely no curbing this morning notwithstanding that it was reported in a morning paper that it would be carried on as usual. When brokers of the standing of Messrs, Pol-lock, Hudson, Oberdorfer, Miller, Page, lock, Hudson, Oberdorrer, Miller, Page, Doscher and Clark unqualifiedly pro-nounce curbing injuries to the ex-change, the mine owner and investor it is pretty much of a lie to state that the "more industrious and the more prominent brokers" object to the way the board of governors is managing things. The present board was not so long ago elected unanimously at a meeting of all the members of the ex-Many mine owners and investors regard its members as thoroughly representative of the more substantial and better reputed brokers and its rulings have so far been heartiy endorsed by many bankers and busiss men interested in Utah mines. One prominent mine owner said today The policy being pursued by the board of governors is highly commendable id if the exchange is ever to have any fluence outside of the narrow limits of the rail that surrounds the ex-change pit, the members must endorse and live up to rules forbidding curb-ing and like pernicious things. The investor and mine owner must be con-sidered and protected."

PARK CITY SHIPMENTS. Consignments This Week Total Over Six Million Pounds.

Shipments from Park City during the past week amounted to approximately 6,000,000 pounds, most of which, it is stated, was directed to the new American smelter in this valley.

According to the Mackintosh sampler reports shipments were as follows:

Daly West......3,341,150 Anchor..... 201,660 Bilver King (estimated).....1,500,000 Total...... 6,175,120

TINTIC SHIPMENTS. Seventy-five Cars of Ore Forwarded - Apex Strike.

BUSINESS VERY COOD CENERALLY

Bad in Strike Center but Prompt Revival Elsewhere.

FINE CROPS ARE ASSURED.

Manufacturing Plants Fully Occupied -Iron Furnaces Suspend Production, Coke Cannot be Secured.

At present equipment for the electric plants and enlarged mill is being hurried to the ground, while under the superintendency of Frank Janney the mines are being got in shape for im-New York, Aug. 29.-R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say: "Gradual resumption of anthracite coal mining is encouraging, although the output is not yet sufficient to have any commercial value. Business conditions are unsatisfactory at the strike center, but reports from all other sections indicate unusually prompt revival after the summer vacaseason, with exceptionally large operations among dealers in the agricultural region. Notwithstanding some bad weather, large crops

are now practically assured. ments on the open market as reported by McCornick and Co., amounted to "Manufacturing plants are now fully occupied as a rule, the least gratifying reports come from furnaces that cannot secute coke, owing to railway blockades. The transportation problem is becoming serious, as the factor of crop-moving is about to be added and, moreover, much coal must be moved by rail that usually goes to consumers by lake and canal.

"Iron furnaces are suspending production because coke cannot be secured and it is evident that the rate of output at the opening of the new month

will show a serious loss.
"The dry goods jobbing trade reports a liberal distribution, and supplies are only moderate in the primary market. Changed conditions in the raw material have accelerated inquiries for cotton goods, buyers seeking figures on forward contracts and placing a fair amount of orders. There is also a better demand to meet immediate require-ments, and exporters to China are again in the market for brown cottons.
"Slightly less activity is seen in men's

Experts have said that the ore will not be found at depth. They have not yet been proven wrong but with the quantity of ore near the surface that we wear, wool and woolen fabrics, but fan-cy worsteds are in better request. At last footwear-markets have been able to secure a moderate advance in prices in response to the recent sharp advance in materials. Jobbers are no longer dis-posed to wait, but place orders freely. Retailers are also pressing jobbers for immediate deliveries of goods for current trade. Leather is strong and active, while hides made higher recor prices, but the market has quieted

Washington, Aug. 29.-Gen. Chaffee has cabled to the war department that he and his successor, Gen. Davis, are of the opinion that another regiment of cavalry can now be spared from duty in the Philippine Islands. The neces-sary orders have been forwarded to him to send home one regiment, and the headquarters and six troops of the Ninth cavairy will be relieved from duty and will sail on the Logan for San Francisco Sept. 16, the remainder of the regiment to sail Oct. 1. The sta-tions for this regiment in the United States have not been designated.

SCIENT IFIC MISCELLANY

The sense organs of fishes have been difficult to understand clearly. The eye, a German writer points out, is most like that of other vertebrates, and has an iris of brilliant metallic luster, a large and round pupil, and a very large lens, and is so sensitive that some fishes find food at depths as great as 200 feet. Proper eyelids are wanting. The nose consists of two holes lined with a corrugated mucous membrane in which the nerves of smell terminate, and its function must be very different from ritory and western mediums, 16@11/2; that of land animals, which deals with fine, 12@161/2; coarse, 12%141/2. once much believed in, proves to be very geble, or absent. Taste is very keen. but its seat must be in the softer parts of the mouth, the tongue being very hard. The organ of hearing is simpler than in other vertebrates, though extremely sensitive. The external ear is wanting and the inner ear consists merely of cavities filled with fluid and with little porcelain-like particles. Of the sense of touch little is known except that it belongs to the whole skin and is very acute in the bristles around the mouth. Fishes are suspected of having a sixth sense, whose organs are pores of the head and in a row extending over a large nerve.

The remarkable zebra hybrid from outh Africa lately acquired by the British Zoological society is a pony bred rom a cross between a zebra and a pony. It resembles a small pony. ody is brown, and the striping is peculiar, the marks on the body being near-ly vertical, while those on the limbs are orizontal to the hocks, below which the olor is black.

Sleep is produced by M. Stephane through the action of electric currents on the nerve centers, respiraon and circulation being unaffected. complete general anaesthesia can be hus obtained without any unpleasant after effects.

A curious growth on trees in Tierra el Fuego is known to the natives as "wooden flowers." It is produced by a parasitic plant, allied to the mistletoe, which develops from sticky seeds deposited by birds and penetrates the bark and wood of the host. The flower-like excrescences, from an inch to two itself, as forced through the bark. The parasitic plant, unlike the mistletoe, eakens and often destroys the branch which it lives, and it makes so intlate a union with a tree that in a ransverse section it is almost impossi ble to tell where one plant ends and the other begins. The parasite lives not more than three or four years, its traces remaining much longer.

In a new synthesis, Prof. Zinno prouces tartaric acid by passing over potassium glycerate, a current of car-bonic acid gas under a pressure of about three atmospheres. The potas-sium glycerate is easily obtained by oxidizing glycerine by means of loxide, or minium and nitric acid, and then adding potassium carbonate to the boiling solution of the lead salt. I thought that the new process should prove important on a large scale for the manufacture of cream of tartar.

A self-lighting cigar is tipped with cap of ground glass, saltpeter, potasfrictional igniter is placed on the sur-face of the cap. On scratching the igniter, the cap burns freely and cannot be extinguished by an ordinary wind. The cap is rendered incandescent and the ground glass fused, so covering the end of the cigar that no unpleasant taste results.

The natural history student finds still any mysteries to solve. The whole lestion of the consciousness and intelgence of animals, says Lord Avebury equires careful study, and there is ardly a single animal whose life hisory is fully known to us. The many problems of the flowers scarcely exseeds. In fact, the problems which evhedge-row, every pond and stream, of-fer us are endless and most fascinating. There is no single substance in nature whose properties are fully known, and we seem to be on the threshold of great discoveries.

Of the 72,000,000 acres in the Philippine Islands, it is estimated that more than 6,000,000 are under cultivation. The native trees thus far enumeraced emped from San Francisco on the 15th and reached Wadsworth, Nev., the 26th. It is thought that in all likelibrace 665 species, and 160 different nathe tive woods entered the market year.

CONTRACTORS COMPLETE WORK

Utah Construction Company Ships Teams and Outfit to Wyoming.

SALINA BRANCH FINISHED.

Two Twenty-Mile Sections Ready for

Laying Steel-Work Commenced On Line to Ogden The Utah Construction company has completed the work on the Salina cutoff as far as the contracts have been let to date. Last night four carloads of horses and implements that have been

used in construction work by the com-

pany in Salina Canyon this summer

passed through Salt Lake on their way

to Wyoming where they will be put to work on track repairs on the Union Pacific main line. With this exodus there are now six teams at work in the canyon finishing up the work prior to the laying of steel When this will be done is at the present time problematical, but it can be safely assured that no rails will be laid on the Salina branch until the steel is released on the main line improvements The company proposes when it does lay

POSTAL CASE APPEALED. Union Pacific Carries Cause to Supreme Court of U. S.

Denver, Aug. 29.-The Union Pacific callway company has app the case in which the Supreme court Colorado decided that the postal telegraph company could secure a right Pacific railroad by condemnation. Another Paper Road. New York, Aug. 30 .- In the hearing of

the application to the state railroad commissioner by the New York Cana-dian Pacific Railroad company for permission to issue a mortgage for \$35,000, 000 in order that the projectors of the railroad may begin its construction, counsel for a leading railroad company, presented an argument declaring that the road has no existence and that it consists only of a consolidation of several railroads which never existed save n paper. The hearing was not con-

New Man for Lehigh Valley.

E. D. Oakes, the assistant city pas-senger agent of the Wabash in St. Louis, has been appointed the traveling passenger agent of the Lehigh Valley in Chicago territory, reporting to W. B. Wheeler, the Northwestern passenger agent, whose office is in that city. Mr. Oakes now is taking a vacation and will assume his new duties on the first of next month. Mr. Oakes is ex pected to take his maiden trip to Salt Lake in the near future when he pro-poses to take in the sights under the chaperonage of his old friend, W. B. Townsend of the Rock Island.

Investigate Chilian Railways.

New York, Aug. 30 .- The chamber of deputies, by a smal majority, has apa preliminary commission to investigate the management of the tate railways, cables the Valpariso correspondent of the Herald. The secretary of finance estimates that the revenues next year will amount to 114,000,000 pesos and that the expenses will be \$5,000,000 pesos. Elaborate preparations are being made to welcome the Arcontine nade to welcome the Argentine battlehip San Martin.

The French minister, Julian G. Girard de Raille, who has been on a leave absence, and the new Paraguayan minister, Senor Huan Cogorno, have rrived here. The Llamia volcano has been in erupbeen reported.

ion since Sunday. No damage has

SPIKE AND RAIL W. H. Snedeker, the San Francisco general agent of the Illinois Central,

is in town. L. B. Gorham, commercial agent of the Rock Island, at Portland, Ore., arrived in Salt Lake this morning.

Commercial Agent J. E. Oglesby, of the Rock Island, is confined to his ome, suffering from a severe cold. H. V. Platt has gone to Pocatello, there the local lodge of Elks proposes o give him a rousing time this even-

The Chicago & Northwestern has 200 double deck sheep cars. Local shippers are wondering what has become of them. Senator Clark is quoted as the authority for the statement that the Deep Creek district will not be over-

oked when the San Pedro road built. The condition of Ticket Agent Larken of Butte was decidedly improved this morning. A second operation, however, will be necessary ere he can leave

District Passenger Agent E. Drake, and Traveling Passenger Agent Tre-wehela of the Rock Island, came It rom Montana this morning. Townsend, the traveling passenger agent of the same road, also came in from the south.

Official announcement is made of the appointment of W. Fred Lovell as assistant superintendent of motive pow-

er on the Santa Fe. Mr. Lovell recently resigned as superintendent of motive power of the Northern Pacific, He will succeed W. A. Nettleton on the Santa Fe.

For Monday and week, we have two specials. BOYS and YOUTHS' good, durable, box calf shoes, all sizes, at \$1.45. Sale of Portuguese East African Possessions to be Announced. New York, Aug. 30.—One of the most interesting features of the slack season in London is a revival of the rumor anent Delagoa bay, cables the Tribune correspondent at London. It is asserted

MISSES' and CHILDRENS kid shoes, with heavy wild light. \$1.15. that the purchase of the Portuguese possessions in East Africa will be an-Sizes 111/2 to 2. nounced when parliament meets, and that it will be followed by German ac-\$1.35. quisition of a portion of them, in ac-cordance with a secret convention with Great Britain. There is no direct con-firmation of this story from an authen-tic source, but there is circumstantial evidence that leads close observers to credit the rumor. Lord Milner's recent visit to Lorenzo Marques never has been satisfactorily explained, nor have Store closes 6 p. m. except Satthe proposed annexations of Transvaa territory to Natal any significance un less the intervening district adjacen to the Portuguese frontier can be add-ed. Men versed in African affairs are
